Bulb Catalogue

AUSTRALIAN GROWN BULBS

Important Notice

All bulbs listed in this Catalog have been grown by us at Geelong and Moolap, Victoria, under the most exposed open field conditions.

The resulting bulbs now offered are of finest flowering quality and size. This cannot be expected of imported bulbs raised in the Northern Hemisphere, with seasons opposite to our own.

This particularly applies to Tulips and Hyacinths, and much of the disappointment experienced with these can be attributed to this fact.

STINTON'S BULBS

TO OUR CUSTOMERS.

THE Claremont Strains of Ranunculus, Anemone, and Freesia, are now well known wherever the English language is spoken.

Merit alone has accomplished this. Enthusiastic letters from all parts of the Commonwealth, New Zealand, and abroad, testify to the superiority of our products.

In sending out this Catalog we have no hesitation in stating that the general quality is better than in any previous year.

The same high quality will be found in the other Bulbs listed in this Catalogue.

The Tulip and Hyacinth sections we specially recommend, and we strongly urge early ordering, as stocks are limited. Every care has been exercised in their production, and all the Bulbs we offer are thoroughly sound, free from disease, and true to description.

New
Ranunculus

"Claremont" Super Hybrids No. 5.

*Award of Merit, Nurserymen and Seedsmen's
Association of Victoria.*

The Committee of Inspection which recommended the granting of this Certificate of Merit, stated: "We consider the new strain of *Ranunculus*, known as the "Claremont" Super Hybrids, to be the best we have yet seen for constitution of plant, harmony of color, form and size. All inferior quality and poor coloring have been carefully eliminated."

This strain of *Ranunculus* stands alone. It has a range of color, size of flower, robustness of constitution and long flowering qualities hitherto unknown.

A Typical Claremont Ranunculus Bloom.
(Half natural size.)

Stock Very Limited.
Prices: 25, 6/-; 50, 10/6; 100, 20/-. Orders of 500 and over, 15/- per 100.

Our Flower Seeds are the best obtainable.

Ranunculus.

Culture.

Prepare your beds for bulbs at least four weeks before planting. To dig and plant in the same operation is to court disaster. All newly-dug land subsides considerably, and takes the bulb with it. Remember the value of slaked lime in your soil, particularly in soils well supplied with humus. But it must be on the land at least a month before planting. Keep your spent blooms cut away and you will lengthen the flowering season by weeks.

Bone-meal used in the same manner and quantity as recommended for Anemones is highly beneficial.

In the case of our new Claremont Super Hybrids, No. 5, it is necessary to plant the tubers a foot apart—so vigorous is the growth—but in the other strains quoted, six inches between tubers will be sufficient. Avoid fresh manures or land recently dressed with organic manures for a previous crop. All tendency to softness in growth should be avoided.

Plant the claws downward, pressing the tuber firmly into the soil, so that the crown is not more than two inches below the surface. If drainage is perfect, abundance of water may be given once the buds appear.

The strains described below are quite distinctive, and may be used with telling effect in color schemes. They are equally valuable for cutting purposes, the flowers being produced on long stems.

CLAREMONT HYBRIDS NO. 1.—Mostly bright Reds. These have not the fiery brilliance of our No. 5 introduction, but provide a much wanted color in early Spring. Flowers are very large, with a high percentage of doubles.

Prices: 25, 4/6; 50, 8/-; 100, 15/-.

CLAREMONT HYBRIDS, NO. 2.—Mostly bright Pinks. These make a lovely bed, quite different in general effect from the foregoing. There is a lightness and daintiness about a bed of this strain, that has to be seen to be appreciated.

Prices: 25, 4/6; 50, 8/-; 100, 15/-.

CLAREMONT HYBRIDS, NO. 3.—Mostly yellows. Years of patient care have not yet eliminated all "foreign" colors, but this is nearer perfection than any we know of this type. A well grown bed of these will make a lasting impression, and we predict for this strain, a great future.

Prices: 25, 4/6; 50, 8/-; 100, 15/-.

CLAREMONT SUPER-GRADE.—Tango shades. This has been one of our most popular lines since its introduction, and each year we receive glowing tributes to its wonderful charm. Nearly all poor colors have been removed, and for the small garden where space is valuable and price a consideration, we strongly recommend it.

Prices: 25, 3/6; 50, 6/6; 100, 12/-.

All vegetable seeds in stock. The best only.

A n e m o n e

or

Wind-Flower

For brilliancy of color, few flowers can compare with the Anemone, which in Spring produces its masses of bloom in endless variety of shades. All varieties are valuable for cutting and last a long time in water.

Culture.

Any good garden soil, moderately well drained suits the Anemone. It likes a free moist soil, but will not stand wet stagnant soil—water at the roots.

A safe fertiliser, is a good quality, finely ground bone-meal, well incorporated with the soil at the rate of three ounces to the square yard.

We recommend late April planting, and the corms should be placed not more than two inches deep, and about five or six inches apart.

Our Anemone corms are of a size which our experience has taught us will give better results than the larger corms, and planting depth is advised accordingly.

Large corms may be had if preferred.

“Claremont” Super Hybrids.

(St. Brigid Type)

This is a highly improved strain, combining the glorious colors of the St. Brigid Anemone, with the robust growth and long-flowering qualities of the Coronaria variety.

Flowers of immense size, with a large proportion of semi-doubles borne on long stiff stems.

Every color known to the Anemone family is represented, and as a cut flower it has few equals.

Prices: 25, 3/6; 50, 6/6; 100, 12/-. Orders of 500 and over, 10/- per 100.

ANEMONE ST. BRIGID CHOICE MIXED.—Remarkable for their immense size, great variation of color, and their long-flowering qualities. Every shade of color will be found here and a bed of them makes a bright splash of color in the garden at a time when most wanted.

Prices: 12, 1/6; 25, 2/6; 50, 4/-; 100, 7/-.

ANEMONE ST. BRIGID BRIGHT SCARLET.—The true St. Brigid type, and a most conspicuous dazzling scarlet. About 95 per cent. true. These make a unique bed.

Prices: 12, 2/6; 25, 4/6; 50, 8/-; 100, 15/-.

Look out for the word “Claremont” on every packet.

ANEMONE ST. BRIGID GIANT VIVID SCARLET.—This variety is very hardy and can be had in flower for three months of the year. Flowers from three to five inches across. For freedom of growth and brilliancy of color.

Prices: 12, 2/6; 25, 4/6; 50, 8/-; 100, 15/-.

ANEMONE CORONARIA (GIANT SINGLE POPPY-FLOWERED ANEMONE).

An immense single poppy, with a wonderful range of color. Flowers are borne on long stiff stalks, well above the foliage.

Prices: 12, 1/-; 25, 1/9; 50, 3/-; 100, 5/-.

ANEMONE CORONARIA BRIGHT SCARLET.

Prices: 12, 2/6; 25, 4/6; 50, 8/-; 100, 15/-.

We have no Agents anywhere.

Freesias.

New "Claremont" Choice Hybrids.

Those who have grown only the ordinary Freesias have little idea of the wonderful advance achieved in this popular flower.

Size of bloom, vigor of growth and constitution have been increased, and the distinctive perfume has been retained.

New colors have been evolved, ranging from pure white to lovely pinks and reds, and also many delightful pastel shades in blue, lavender and orange.

Prices: 25, 5/-; 50, 8/6; 100, 15/-.

FREESIA (Refracta alba).

Good Flowering Corms: 25, 2/-; 50, 3/6, 100, 6/6.

See page 13 for Pot Culture of Freesias.

These are justly prized for their delightfully fragrant graceful blooms, which last longer in water than almost any other flower.

We Stock Ornamental Trees and Shrubs in great variety.

Culture of Freesias.

Good drainage is absolutely essential. Apart from this the plants will thrive in almost any garden soil. The corms are somewhat brittle and must be handled with care.

Plant with the base of the corms not deeper than three inches from the surface.

As a pot plant it is hard to beat, so accommodating is it to house conditions. It must, however, be kept in the lightest part of the window.

The corms of the Hybrids we offer are unusually large and will produce excellent blooms of many colors new to the public.

Tulips.

Until recent years practically all Tulips were imported from Holland. When the bulbs arrive here, they start into immediate and, of course, premature bloom. This is done at the expense of the bulb, and its food content, and many are lost through sheer exhaustion.

If the others recover in eighteen months time, luck is with us, and we may have some success. Fungus and insect pests, however, are particularly fond of enervated plant life, and having taken toll of our precious bulbs, we have little left.

These days, happily, are gone for ever.

The bulbs we offer here are grown at our own grounds in Geelong, under open field conditions, without recourse to artificial aid of any kind. All are of top size and first quality, grown to produce first-class blooms this season.

Culture.

Thorough drainage is absolutely essential. This assured, they do best in a rather heavy rich soil, in which they should be planted at least four inches deep. In light sandy loam five inches is necessary. Many thousands of Tulips are lost through too shallow planting.

Early Flowering Single Tulips.

For bedding purposes or pot cultivation, these are unsurpassed. Few grow over 15 inches in height, all are of great substance, and we offer a selection of only the very best.

Prices: Per doz., 7/6; 50, 30/-; 100, 57/6.

Special quotation for larger quantities.

COULEUR CARDINAL.—Rich Crimson Scarlet.

PRINCE OF AUSTRIA.—Brick Red, shading to Buff Orange.

VERMILION BRILLIANT.—Rich dazzling Scarlet. One of the best.

MONTRESSOR.—A magnificent Yellow.

THOMAS MOORE.—Terra-cotta, with Orange tinge.

KING OF THE YELLOWS.—Fine bold flower. Bright Yellow.

POTTEBAKKER WHITE.—Large, pure, handsome.

WHITE SWAN.—Large globular flower of great substance.

Trees suitable for shelter-belts. Sheep owners consult us.

Darwin Tulips.

These are taller growing than the Early varieties, and again we would emphasise that we have selected only the best varieties.

Prices: Per doz., 7/6; 50, 30/-; 100, 57/6.

Special quotation for larger quantities.

BARONNE DE LA TONNAYE.—Beautiful full Rose, shading to Silvery Rose.

BARTIGON.—Fiery-red flowers, pure white base. An excellent variety.

CLARA BUTT.—Delicate soft Rose, of perfect form and great substance.

EUROPA.—Glowing Cochineal Red, large snow-white centre.

FARCOMBE SANDERS.—Geranium Scarlet. Broad petalled and beautiful.

GRETCHEN.—Blush pink, globular flower, distinctive.

GUSTAVE DORE.—Bright Rose, shading lighter at edges. White base.

GLORY.—Fine brilliant Scarlet.

ISIS.—Bright red. Very large flower.

INGLESCOMBE YELLOW.—Although this is a Cottage Tulip, it has the habit and characteristics of the Darwin, and is of first quality—a handsome bold Yellow.

LA TULIPE NOIR.—The "Black" Tulip. Velvety Maroon Black. A magnificent flower.

LOVELINESS.—Attractive rich Rose, brighter color at edges.

LE NOTRE.—Very large, Rose cup. One of the best.

LA CANDEUR.—Creamy White, flushed pink in early stages. Fine globular flower.

MADAME KRELAGE.—Very large flower, Salmon Rose, silvery white margin. Centre white. Beautiful.

MRS. POTTER PALMER.—Pale Claret. Blue and white base.

NORA WARE.—Heliotrope, with tinge of rose and broad white border.

PRIDE OF HAARLEM.—Brilliant Cochineal Carmine.

PHILIP DE COMMINES.—Fine form. Dark Plum, with darker sheen.

PSYCHE.—Soft Blush Rose, deeper color outside petals.

REV. EWEBANK.—Beautiful Mauve, shaded bronze, with paler edge.

REMEMBRANCE.—Heliotrope with glistening rose sheen.

THE SULTAN.—Almost a Black Tulip. Strong grower.

WILLIAM COPLAND.—Beautiful soft Lavender. Specially recommended for pot work.

WILLIAM PITT.—Glowing deep Scarlet. Blue and white base.

ZULU.—Handsome globular flower. Dark Purple, with black lustre.

MIXED DARWIN TULIPS.

Prices: Per doz., 6/6; per 100, 52/-.

Flowering trees and shrubs. A great variety.

Stinton's Exhibition Hyacinths.

There is no more accommodating bulb in cultivation than the Hyacinth. It may be grown in glasses (in water), in pots, on bowls (in fibre, which we supply), or in ordinary potting soil. As a bedding plant, also, it is superb, and we specially recommend our mixture for this purpose. These cost less than the named varieties, but are of best quality, and only the best varieties are listed.

Culture.

Failures with bulbs are most frequently due to faulty planting—too deep or too shallow. A good general rule is to cover the bulb with soil from once and a half to twice its own depth, measuring the bulb from base to shoulder. A bulb measuring 2 inches from base to shoulder should be covered with 3 to 4 inches of soil. The greater depth in a light soil. Tulips are an exception to this rule, but it stands good with the Hyacinth grown as a bedding plant. Place a little clean sand under and around your bulbs. Apart from the matter of drainage, many insect pests dislike anything of a gritty nature. Avoid fresh stable manure, and keep manure of any sort well beneath the bulb.

Prices: Each, 1/6; per doz., 16/6; per 100, 125/-.

Special quotation for larger quantities.

BARONESS VAN THUYLL.—Pure White, large truss.

BLOXBERG.—Lovely Porcelain Blue.

EDISON.—Blush Pink, fine spike.

GARRICK.—Dark blue. Fine bells.

GENERAL ANTINCK.—Porcelain Blue, dark centre, good truss.

GENERAL PELISSIER.—Deep Crimson, magnificent spike.

L'INNOCENCE.—Pure White, extra large truss.

LA GRANDESSE.—Purest White, fine spike.

LA PEYROUSE.—Clear Porcelain Blue.

LORD BALFOUR.—Distinct, Purplish Mauve.

MORENO.—Large Waxy Pink bells.

QUEEN OF PINKS.—Lovely Pink, large compact spike.

REGULUS.—Light Blue, large truss.

YELLOW HAMMER.—Golden Yellow. Fine large spike.

MIXED HYACINTHS FOR BEDDING.

Prices: Per doz., 12/6; per 100, 95/-.

SINGLE WHITE ROMAN HYACINTHS.

These are splendid for pot work or window boxes, remaining in perfect condition for a long period, and are great favorites on account of their delightful perfume.

Prices: Per doz., 10/-; per 100, 75/-.

We stock all classes of climbing plants.

Irises.

In elegance of form and exquisite variety of colors, Iris claim attention always. They are the nearest rivals to the orchids, and were they difficult to grow would be as costly. They can be cultivated by anyone with extreme ease in the poorest garden, in almost any situation, and considering the outlay, they give a return in beauty and grace surpassed by none.

SPANISH IRIS.

The flowers are exceedingly beautiful, and the plants very hardy. They are valuable alike for garden decoration and cutting.

Prices: Named Varieties: Per doz., 7/6; 50, 27/6; 100, 52/-.

BLANCH FLEUR.—Pure White.

RECONNAISSANCE.—Dark Bronze.

CAJANUS.—Deep Golden Yellow, excellent for cutting.

FORMOSA.—Large Blue.

LOUISE.—Light Blue, finest for cutting.

EXCELSIOR.—Fine Blue.

MIA.—Bright Blue.

KING OF THE BLUES.—Lovely large Blue.

In Splendid Mixture, per 100, 17/6.

DUTCH IRIS.

BLUE CLOUD.—Prices: Per doz., 8/6; 50, 30/-; 100, 55/-. A magnificent Iris of outstanding merit. The flowers are very large, with exquisitely soft colorings.

MIXED DUTCH IRIS,

50, 10/6; per 100, 20/-.

Narcissus.

(Daffodils)

These are too well known to require description. They are general favorites, and being moderate in price, are valuable for planting in masses for naturalization purposes. For cut-bloom purposes they cannot be excelled.

EMPEROR.—Per doz., 2/6; per 100, 17/6.

SIR WATKIN.—Per doz., 2/6; per 100, 17/6.

LORD KITCHENER.—Per doz., 10/-.

PRINCEPS.—Per doz., 2/-; per 100, 12/6.

MIXED.—Per doz., 2/6; per 100, 17/6.

ORANGE PHOENIX.—Per doz., 2/-; per 100, 12/6.

MISCELLANEOUS BULBS.

BABIANA.

SCILLA BLUE.

SCILLA WHITE.

STERNBOYIA LUTIA.—Autumn-flowering Crocus. Doz., 5/-.

NERINE SARNENSIS.—Spangled Scarlet. Each, 1/6.

NERINE ALBA.—Pure White. Each, 1/6.

NERINE JAPONICA (RADIATA).—Deep red. Doz., 7/6.

TRITONIA.—Per doz., 5/-.

We grow trees and shrubs suitable for sea-side conditions.

STINTON & SON,

Ixias.

These should be grown in an open position, fully exposed to sunlight. Valuable for cutting.

CLAREMONT MIXTURE.—Per doz., 1/6; per 100, 10/-.

Grape Hyacinth (Muscari)

Heavenly Blue.—Beautiful Bright Blue.

Prices: Per 100, 12/6; per 1,000, 80/-.

These miniature gems will grow in any good garden soil. Will thrive in the open or in partial shade.

Admirable for bowl or pot culture, when, after flowering they may be transferred to the garden.

Cyclamen.

(Persicum)

It is not generally known that this beautiful plant can be grown in Victoria under ordinary garden conditions. With an eastern exposure—preferably on the east side of a fence—in an ordinary garden soil, blooms may be had continuously for three months. The plants should, be allowed a resting period after blooming.

The Bulbs we offer are one year old, and are of the giant-flowering type. They should be planted to a little more than half their depth, late in March.

CLAREMONT MIXTURE.—Prices: Doz., 10/-; 50, 45/-; 100, 80/-

If your past experience of our Bulbs is satisfactory, please lend your neighbor this Catalogue.

Bulb Growing in Pots, Bowls or Window Boxes.

Those who dwell in flats, and others, who from force of circumstances, are compelled to live where ordinary gardening is impossible, can always have nature's choicest blooms in the dull season of the year. Bulb-growing in pots, bowls, or window-boxes, makes this possible, and with the expenditure of some care, thought, and a little money, perfect blooms may be had.

Freesias, Tulips, Hyacinths, Anemone, Iris, Muscari, and Narcissus, can all be used for this method.

Time of Potting.—April and May are the best months for potting most Spring-flowering bulbs.

The Best Compost.—Any good, free, sweet soil will do, adding 1½ oz. of fine bone-meal to every bushel of soil. Mix well before using. Never pot in soil that is wet or sticky. If the soil is sterilised before using

a great deal of trouble can be avoided. Small quantities of soil can easily be sterilised by placing it in a kerosene tin perforated with small holes underneath, and pouring boiling water on it, then spreading out the soil to dry.

See our Bulb Collections for value, Page 15.

Good Drainage.—Use a few pieces of charcoal for this purpose, covering with some coarse soil before putting in the potting material.

Depth to Plant.—With the exception of Hyacinths and the larger Daffodils, bulbs grown in pots should be covered with at least half an inch of soil.

After Potting.—Stand the pots in the coolest and shadiest spot possible. A cellar floor, even an old well will do. If it is necessary to keep them in the dwelling, they must occasionally be watered. But the conditions for 12 weeks after potting should be such that at the end of that time the roots of the bulbs will be showing out of the bottom of the pots, but there should be little, if any, top growth.

Move to the light. Keep clear of draughts. Water in moderation until the flower shows color, when more copious waterings may be given.

Growing Bulbs in Vases or Bowls.—A charming effect may be obtained by growing Spring-flowering bulbs in vases or bowls, with or without drainage by using our Peat Fibre Mixture (8/6 per Bushel). This is light, clean and nice to handle, and remains sweet—a most important factor. It is in every way preferable to soil for growing Bulbs in bowls or vases without drainage.

Autumn Planting for Winter Flowering.

Certain plants, if well established, before the soil is too cold, will, in well-drained and reasonably protected gardens, give quantities of bloom throughout the winter months. Antirrhinums (Snapdragons) and Iceland Poppies, are perhaps the most accommodating in this regard.

These are followed up by Wallflowers, Polyanthus, Violets, and others in late winter.

In early April we publish a list of suitable plants for Autumn planting, which are thoroughly hardened by a new process.

In October we publish our Spring bedding list. All our customers receive a copy. Your gardening friends may have one. Please post name and address to us.

Seeds for Present Sowing.

We have Special Strains of Pansy, Cineraria, Primula, Gloxinia and Cyclamen.

We carry an immense stock of flowering-shrubs.

Bulb Collections.

Our £1/1/- Collection (value, £1/6/6).
